IMGUR CODE CHALLENGE

Write a set of automated tests using nightwatch.js to test imgur.com. Include tests of the following functionality:

- New Post: make sure you can upload an image and that it takes you to that page after
- Search: make sure you can search, and that the results are tied to your query
- “Random Mode” function: test that the random button works and takes you to a new page without errors.

Include a readme.md explaining your test choices. If any tests fail your expectations, please note them as well.

Browsers to test: Chrome & Firefox
